Description. 🔗

Senior backend developer with 20 years of experience.

PHP developer since 2003, specialized in symfony, with which I have worked in all his versions. Since October 2017 I am working on Golang projects. Since I started working as a developer I have worked on very different projects, well by its size or its nature, so I have a lot of experience in architecture, micro services, development methodologies, etc. #Technological profile.

- **Programming**:
  - Golang:
    - Since October 2017, I have been working with Go, motivated in continuous learning and be able to make up for the shortcomings of my usual programming language (PHP), in order to certain projects.
  - PHP:

- More than ten years of experience in PHP programming. Currently using version 8
    - Symfony:
        - I started working with the framework in 2007, with version 1.0. I have worked with all versions up to the current version 6.*
    - Bash script:
        - Since 2001, I have been scripting in this language.
    - Development methodologies:
        - Development based on unit tests.
        - DDD and hexagonal architecture.
        - CQRS and event sourcing.
        - Use of design patterns, SOLID principles and clean code.
- **DevOps**:
    - Packer
    - Terraform
- **Systems**:
    - Databases:
        - MySQL.
        - PostgreSQL.
        - MongoDB.
        - Redis
    - Servers:
        - Since 2001 I work with Linux, so I have installation knowledge and environment management.
        - Apache2 and Nginx web servers.
        - Administration of servers in Amazon Web Services.
        - Docker, both in its use as a tool in the development of projects, as well as in its use as a tool in the development of projects. the construction of CI/CD environments.
        - Continuous integration, continuous deployment (CI/CD):
            - Jenkins (https://jenkins.io/).
            - Scrutinizer (https://scrutinizer-ci.com/).
            - Bitbucket pipelines (https://bitbucket.org/product/features/pipelines).
            - Drone (https://drone.io).

Professional experience. ⚭

- **Whalar_**

- Period: February-2023, October-2023,
- **World Mobile**:
    - Period: November-2021, January-2023,
- **Ritmo**:
    - Period: July-2021, October-2021,
- **Paack**:
    - Period: November-2020, July-2021,
- **Freelance**:
    - Period: Març-2020, November-2020,
- **Deliverea**:
    - Period: Juny-2019, Març-2020.
- **Freelance**:
    - Period: October-2017, Juny-2019.
- **Nektria**:
    - Period: April-2017, October-2017
    - Position: Backend developer.
- **Enables Concierge**:
    - Period: October-2016, March-2017
    - Position: Backend lead.
- **Letgo**:
    - Period: May-2015, September-2016
    - Position: Backend developer.
- **Atrapalo**:
    - Period: October-2014, March-2015
    - Position: Backend developer.
- **Texyon Games**:
    - Period: October-2013, September-2014
    - Position: Backend developer.
- **Akamon Entertaiment**:
    - Period: May-2011, February-2013
    - Position: Senior PHP developer
- **Aldia Gestión**:
    - Period: December-2003, May-2011
    - Position: Developer

Completed projects. 🔗

I have done some personal open source projects published in github.

- projects developed in Go used on Raspberry:
    - **raspberryRainSensor**
    - **raspberryTelegram**
    - **raspberryWaterSystem**
- **php-git-hooks**:
    - Git hook for PHP projects.
- **php-value-objects**:
    - Collection of value objects for projects with DDD in PHP.
- **event-bus-bundle**:
    - Bundle to use event bus in symfony projects.
- **go-eventsourcing**:
    - Library to use event sourcing in Go projects.

Apart from these, I have collaborated in other open source projects making contributions to the code.

Academic studies. 🔗

- Degree: Diploma in Management and Public Administration.
- Period: October-1997, July-2005
- University: Jaume I - Castellón
- Languages: English, level B1.
